Line & Wire Guides & Finishing Rings

Beckson's line of wire and line guides makes for the perfect finish. Many applications requiring access for wire or line leave unsightly holes which can cause chafe or wear in unwanted areas. With several sizes to choose from, Beckson has the finishing ring to complete the job. Thin ring models are the best solution for those tight spaces. Ideal for use in running networking cable, electrical wire, and stereo equipment. The uses are multiple. Made from durable ABS U.V. resistant plastic. Installs by either friction fit, or light use of silicone sealant.

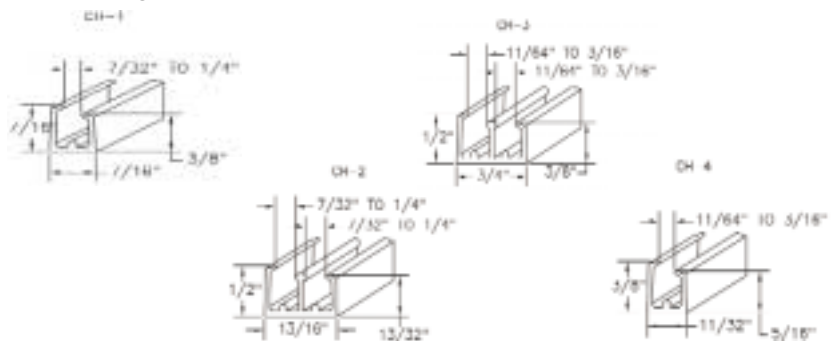

Item	I.D./Width	O.D./Length	Color
A-150B	1.50"		Black
A-150BT	1.50"		Black
A-175B	1.75"		Black
A-175WT	1.75"		White
A-200BTS	2.00"		Black
A-200WTS	2.00"		White
BKT-2B	2.00"		Black
AH42R-B1	1.63"	3.63"	Black
AH42R-W1	1.63"	3.63"	White

Glass Channel

Beckson's channel window track is available for either double or single windows. Made from a durable U.V. resistant plastic which is not prone to cracking, it is ideal for both in-door and outdoor environments. The channel groove is designed to be .005" narrower than standard cast acrylic sheet thicknesses to provide positive pressure against the glass at all times to prevent leaking and rattling. The elevated slide in the bottom of the channel reduces frictions and makes opening and closing the slides a breeze. Accommodates two standard sizes of glass or plastic sheet 1/4" and 3/16". Add suffix "B" to part number for black.

Item	Groove	Glass Thickness	Color
CH-1	Single	1/4"	White
CH-2	Double	1/4"	White/Black/Brown
CH-3	Double	3/16"	White
CH-4	Single	3/16"	White
